

EKA SILVER +

CLASSIC RANGE

EKA SILVER + is a product excellent for sanding of lacquer.

The very soft lightweight paper in combination with the high quality Silicon Carbide give very smooth surfaces with fine and consistent scratch pattern.

EKA SILVER + is further treated with a stearate coating which together with the semi-open coat grain distribution effectively reduces clogging problems. The Stearate also contributes to an improved surface finish. The product is especially suitable for hand sanding as well as for portable sanding machines.

TECHNICAL SPECIFICATION

Backing:	B-weight paper
Bonding:	Resin over resin
Treatment:	Stearate layer
Grit:	Silicon Carbide
