

EKAMANT

EKA 5000 V

EKA 5000 V IS AN ALL-AROUND PRODUCT MADE WITH VELCRO BACKING. The sharp aluminium oxide together with smooth stearate makes the product suitable for most types of wood applications, lacquer and coating sanding, as well as light metals. Due to the sharpness, less pressure is required to achieve high stock removal.

EKA 5000 is used from aggressive sanding in the beginning of the process and all the way to fine finishing sanding. This product is treated with stearate to reduce clogging and extend service life.

We offer a 15 hole layout in our standard range. This hole configurations will also fit for 9H and 6H pads.

TECHNICAL SPECIFICATION

Backing: B-, C-weight paper with Velcro backing

Grit: Aluminium Oxide

Treatment: Stearate layer

Coating: Semi Open

APPLICATIONS

Universal disc product.

Wood: Medium-hard wood
