

EKAMANT

## EKA 5000 V SHEET

EKA 5000 V IS AN ALL-AROUND PRODUCT MADE WITH VELCRO BACKING. The sharp aluminium oxide together with smooth stearate makes the product suitable for most types of wood applications and light metals. Due to the sharpness, less pressure is required to achieve high stock removal.

EKA 5000 is used from aggressive sanding in the beginning of the process and all the way to fine finishing sanding. This product is treated with stearate to reduce clogging and extend service life.

## TECHNICAL SPECIFICATION

**Backing:** B-, C-weight paper with Velcro backing

**Grit:** Aluminium Oxide

**Treatment:** Stearate layer

**Coating:** Semi Open

## APPLICATIONS

**Wood:** Medium-hard wood

**Lacquer:** PU and water based lacquers
