

EKAMANT

## EKA 5000 V SHEET ROLL

EKA 5000 V IS AN ALL-AROUND PRODUCT MADE WITH VELCRO BACKING. The sharp aluminium oxide together with smooth stearate makes the product suitable for most types of wood applications and light metals. Due to the sharpness, less pressure is required to achieve high stock removal. Comes in a handy storage box of 50 m rolls. The rolls are perforated every 125 mm and prepared for easy tearing.

Compatible with the EKA Ergo hand block (70 × 125 mm) for ergonomic and efficient manual sanding. See the Complementary Products section for more information.

### TECHNICAL SPECIFICATION

**Backing:** B-, C-weight paper with Velcro backing

**Grit:** Aluminium Oxide

**Treatment:** Stearate layer

**Coating:** Semi Open

### APPLICATIONS

**Wood:** Medium-hard wood

**Lacquer:** PU- and water-based lacquer
